prevero 360°

One Stop Shop Performance Management & Self-Service BI

Companies often use solutions from different providers for P&L, financial and balance sheet planning, as well as reporting, ad hoc analyses and business management. The prevero 360° platform offers a comprehensive CPM (Corporate Performance Management) environment with a set of well-founded business applications for all areas of strategic and operative business management.

Performance Management with prevero 360° helps controllers and managers to make an intelligent connection between strategic planning and operative business processes and gives them a 360 degree view on their company. As the modules do not require any programming, it is easy to create analyses, reports, charts and models for particular sectors or specialist fields.

One solution for all requirements

prevero 360° offers a comprehensive platform for (amongst others):

- Operative planning
- Sector-specific controlling
- Multi-project controlling
- Risk management
- Strategic controlling
- Consolidation
- Easy creation of individual applications

Fast implementation and easy use

The prevero 360° platform enables easy access to more than 30 different source systems, such as SAP®. prevero OfficeIntegration offers a seamless integration into Excel, Word or PowerPoint templates enabling users to work with familiar working environments and processes.

Thanks to the WebClient, the application is cloud ready. Access via iOS and Android devices is possible via the MobileClient. The in-memory technology MemoLytics®, developed by prevero itself, ensures the required performance.

about us.

Founded in 1994, prevero is a leading provider of planning, analysis and reporting software. The solutions provided by prevero enable companies to sustainably improve their controlling and decision processes.
